## Profile

Detail-oriented Full-Stack Developer with experience in building scalable web and mobile applications using the MERN stack and React Native. Skilled in designing secure authentication systems, RESTful APIs, and role-based dashboards, with hands-on experience in healthcare and content-driven platforms. Focused on writing clean, maintainable code while delivering secure, high-performance, and responsive user experiences.

## Education

### BS in Computer Science

COMSATS University Islamabad, 2022 – 2026.

CGPA: 3.49

## Experience

### Frontend Developer | SharkStack | May 2025 – October 2025

- Designed and implemented responsive, high-performance React.js interfaces using reusable components and modular architecture to support scalable and maintainable frontend systems.
- Managed application state with modern patterns and integrated RESTful APIs for secure authentication, dynamic data rendering, form handling, data validation, and error management.
- Collaborated closely with backend engineers, QA testers, and UI/UX designers to deliver complete end-to-end features, maintain code quality, and ensure alignment with product goals and timelines.
- Conducted usability analysis and optimized UI workflows based on user feedback and analytics insights, reducing interface issues, improving accessibility, and enhancing overall user satisfaction.

## Projects

### HEALTH CLOUD | FINAL YEAR PROJECT (FYP)

[GitHub](#) | React Native, React.js, Node.js, Express.js, MongoDB, REST APIs, JWT Authentication, Git.

- Designed and implemented responsive, high-performance React.js interfaces with reusable components to support scalable front-end architecture.
- Managed application state and integrated RESTful APIs for secure authentication, dynamic data rendering, form handling, and error management.
- Collaborated with backend engineers, QA testers, and UI/UX designers to deliver complete end-to-end features aligned with product requirements.
- Analyzed and optimized UI workflows based on user feedback, enhancing usability and overall user satisfaction.

## **BYTVANCE**

[GitHub](#) | [bytvance.vercel.app](https://bytvance.vercel.app) | React, Node.js, Express.js, MongoDB, Tailwind CSS, JWT Authentication, Bcrypt, REST APIs, Cloud Deployment, Git, GitHub.

- Developed a full-stack blog application enabling users to create, manage, and publish rich content with seamless image handling and smooth user interactions.
- Implemented secure authentication and session management, and built a responsive UI with efficient APIs for robust content and user management.

## **PERSONAL PORTFOLIO**

[GitHub](#) | [asifdev.vercel.app](https://asifdev.vercel.app) | React.js, Tailwind CSS, Redux Toolkit, JavaScript, HTML5, CSS3, Vercel (Deployment), Git, GitHub.

- Developed a personal portfolio website to showcase projects, skills, and professional achievements through a clean and interactive user interface.
- Ensured responsive design and seamless navigation to effectively highlight full-stack MERN applications and frontend projects.

## **ABITA**

[GitHub](#) | [abita.vercel.app](https://abita.vercel.app) | React.js, Redux, Redux Toolkit, JavaScript, HTML5, CSS3, Tailwind CSS.

- Built a responsive furniture shopping application featuring cart and favorites management to enhance user engagement.
- Improved the browsing experience with search functionality, product filtering, and efficient state management for smooth interactions.

## **Skills & Technologies:**

### **Languages:**

- JavaScript, TypeScript, Python, Java, C++, SQL

### **Frameworks/Libraries:**

- React.js, React Native, Node.js, Express.js, Tailwind CSS, Redux, Zustand, Shadcn-ui.

### **Web Technologies:**

- JavaScript, React.js, Tailwind CSS, REST API, JWT Authentication, Node.js, Express.js.

### **Programming Languages:**

- Python, JavaScript, C++, Java.

### **Tools & Platforms:**

- MongoDB, MySQL, Git, GitHub, Docker.
